IRISES

NEW VARIETIES

RAISED BY
C. H. HALL

Aliquippa (1924)—Good sized flower of pale massicot yellow, with luminous center of deeper coloring. A pallida seedling of fine, erect habit, vigorous growth, and very free-blooming. Make a rich and most attractive light yellow garden effect. 34 inches. \$5.00 each. Delivery after July 1, 1924.

Duquesne (1923)—S. manganese violet, with whitish midrib; F. rich, velvety prune purple; yellow beard. A well finished, finely formed flower, with distinctive and elegant color contrast. Late bloomer. 36 inches. \$7.50 each.

Priscilla (1923)—S. pallid violet; F. rich velvety blackish purple, bordered pallid violet. A dainty flower; its clear, pansy-like coloring showing up with as fine effect indoors as in the garden. 30 inches. \$5.00 each

Yellowstone (1923)—S. straw yellow; F. velvety pansy purple, with noticeable warm glow. A choice "yellow-and-red" effect. Shows pallida influence in the form and distribution of the flowers. 28 inches. \$5.00 each.

Shipment by parcel post prepaid.
